BAMBOO

BAMBOO
ELITE

Fabric

The fabric of the BAMBOO lining is made of bamboo fibre. Bamboo is natural, extraordinarily soft and comfortable and is made from a particular plant that grows in pure and uncontaminated mountainous areas. Bamboo fibre is recyclable and is hollow in nature, thus providing excellent breathability and helping to disperse excess heat, allowing a feeling of freshness and rest. Besides being naturally anti-odour and natural anti-mould.

Padding

Made with fresh bamboo that helps the fast dispersion of moisture thanks to its hollow fibre structure and breathable, hygienic and fluffy soft-fibre support.

Washing

60 ° washable lining.
