

Silver Tencel

SILVER TENCEL

SILVER TENCEL
ELITE

Fabric

The fabric of the SILVER-TENCEL lining is composed of a special thread to which silver microparticles are linked by means of high-level technological processes.

Silver has been known since ancient times for its excellent anti-microbial properties, it eliminates odours caused by bacteria and moulds and it is also antistatic because it has very high electrostatic and conductive characteristics.

Furthermore, the fabric contains TENCEL, 100% natural fibre, ecological obtained from the cellulose of some types of trees, with a high resistance,

soft, breathable and absorbs moisture very well dissipating it very slowly to allow a rest of excellent quality. Tencel is totally biodegradable and regulates the ideal body temperature during sleep.

Padding

Made with fresh bamboo that helps the fast dispersion of moisture thanks to its hollow fibre structure and breathable, hygienic and fluffy soft-fibre support.

Washing

60 ° washable lining.
